Hi Thomas,

I'm David Plumb, currently developing an open-source project called COMPASS - a logic-based framework for autonomous ethical reasoning, contradiction analysis, and simulation.

It's fully implemented, documented, and available here:

<https://github.com/dwpplumb/COMPASS>

I'm submitting it to arXiv under cs.AI/cs.LG, but as a first-time author I need an endorsement.

Would you consider endorsing it? Here's the direct link:

<https://arxiv.org/auth/endorse?x=Q9TQSS>

If you'd like, I can send you the PDF of the submission as well.

Thanks so much for your time and contributions to the field - your work on structured AI has been very inspiring.

Best,
